Sociopedia.isa

“Living Social Science” – a new concept

1. AIMS AND SCOPE

Sociopedia.isa is a new concept in the production and dissemination of knowledge. It combines the best of two worlds: the opportunities the internet offers for rapid publication and the scientific quality guaranteed by thorough and imaginative editing and peer review. While experienced editors and peer review ensure the highest possible quality, the internet makes it possible to provide the most recent ‘state-of-the-art’ assessments. Sociopedia.isa, then, offers ‘living social science’.

Sociopedia.isa is an online database with ‘state-of-the-art’ review articles in social sciences. It guarantees users that the reviews are up-to-date and will be updated on a regular basis. Each entry has a discussion section to supplement it.

Sociopedia.isa is an ISA project developed by four founders: Izabela Barlinska, Bert Klandermans, Kenji Kosaka and Michel Wieviorka. It is a joint venture of the International Sociological Association (ISA) and SAGE.

The founders are the first Editors of *Sociopedia.isa* and appoint Associate Editors and an Editorial Board consisting of senior and junior experts in the field. The Editors solicit entries and subject each to a peer review process. All entries in *Sociopedia.isa* will be subject to a rigorous procedure of double blind peer review.

Entries will be included on this basis. They can be submitted by the author or commissioned by the Editors. The Editors will ensure that updates are prepared on a regular base. If an author is unable or unwilling to provide an update, a new author may be solicited.

To each article an edited discussion section is added, which is open to readers. Commentaries will be refereed by the Editors and Associate Editors. Based on the discussion, they may ask the author to write an update of his/her entry or they may ask another scholar to write a commentary or a separate entry.

2. STRUCTURE OF COMMENTARIES

A commentary should contain several elements. Please structure the commentary in accordance with the indicated order. Commentaries that do not meet the requirements will not be taken into consideration.

- Some general remarks:
- **Length:** a commentary should be **between 500 and 1000 words** in total, excluding the bibliography (see below).

- References should be in **Harvard style**. Since the commentary is published online, **no footnotes** can be published.
- **Language:** The commentary is written in **English**. Non-native English speakers need to make sure that their commentary is written in correct English. It is recommended that non-native speakers have their commentaries checked by a native speaker.
- **Optional: Copy of the commentary in another language:** *Sociopedia.isa* encourages authors to send in a full copy of their commentary in (one of) the two other official languages of the ISA namely French and Spanish. The author needs to make sure that such a translated commentary is an exact copy of the final version of the English commentary.
- The commentary should be structured in three parts:
 - **Title:** "Commentary on article "ADD NAME" by "ADD NAME AUTHOR".
 - **1. Introduction:** a short description of what the argument is about of approximately 50 words.
 - **2. Elaboration of the critique** (between 400-900 words). The critique may address such topics as:
 - 2a. Theoretical foundation: critique of the way the field is delineated by the author, or of the way theories are interpreted; critique of the scope of the literature cited; or critique of the theories discussed.
 - 2b. Empirical references: Empirical evidence may be incomplete, misinterpreted, or irrelevant.
 - **3. Short concluding statement** of approximately 50 words.
- Finish up the article with the following two elements:
 - Cite up to **5 references**. Optionally, these references may be recommended for further reading.
 - Add a **short author biography** of approximately 10 to 20 words including the name, location (e.g. affiliation with a university or other institution) and expertise of the author.
- Additional note: Referring to commentaries:
 - If you want to **refer to a commentary on a Sociopedia.isa article**, please add the following link: <http://www.sagepub.net/isa/resources/pdf/Title/Commentary.pdf>
For example, the commentary on the article "Health and Social Care" can be referred to with: <http://www.sagepub.net/isa/resources/pdf/HealthandSocialCare/Commentary.pdf>
